# Why study at European University?

## FACULTY of MEDICINE

Based on the philosophy of helping humans to relieve the pain, European University Faculty of Medicine pursues teaching and research in a way that is necessary for the community, patients and medical sciences.

The Faculty has acclaimed international recognition for its continuous investment in human capital, modern medical and information infrastructure and student services.

We have Georgia's one the largest volumes of European-level or internationally excellent medical teaching and research facilities. You will be taught by some of the Georgia's leading scholars in these fields, and benefit from an environment in which teaching and research go hand-in-hand.

**The European University has an agreement with 'MAX Healthcare Institute' and 'Indian Spinal Injuries Center' to which medical students can undergo clinical practice in different departments under the supervision of Indian Experienced Doctors.**

*I chose European University  
because it gave me various  
opportunities for my future.*

Arunika Joshi  
Student of Medical  
Doctor Program

## About European University

European University is a popular higher education institution in Georgia dedicated to the spread of European values and excellence in teaching, research and student services. To achieve our ultimate goals and ensure the success of the community, we strongly support and value common ideals of collaboration, diversity, respect, integrity and accountability. Our multicultural community of students and affiliated scholars is the heart of the university. We run community programs to help foreign students to become an integral part of student life through cultural awareness tours, sports events and various student clubs. Every new member of the community enjoys the friendly and supportive atmosphere and has an opportunity to acquire required academic and life skills through rigorous and interesting study process.

European University - successful way for future!
